

U.S.D.A. – Agricultural Research Service

Hard Winter Wheat Regional Coordination – R. Graybosch, L. Divis, Lincoln, NE

Hard Winter Wheat Quality Lab – B. Seabourn, L. McLaughlin, Manhattan, KS

Regional Molecular Marker Laboratory – Guihua Bai, R. Bowden, Manhattan, KS

Rust investigations – Yue Jin, J. Kolmer St. Paul, MN; Xianming Chen, Pullman, WA

Hessian fly investigations – Ming Chen, C. E. Parker, Manhattan, KS

Russian wheat aphid / greenbug investigations – C. Baker, D. Porter, Stillwater, OK

Texas Agricultural Experiment Station

TAMU Research & Extension Center, Dallas, TX – R. Sutton

TAMU Research & Extension Center, Amarillo, TX – G. Peterson, J. Rudd, R. Devkota

TAMU Research & Extension Center, Vernon, TX - J. Baker

New Mexico Agricultural Experiment Station

Agricultural Science Center, Clovis, NM – R.E. Kirksey, M.A. Marsalis, C.A. Werner, A. Scott

Agricultural Science Center, Farmington, NM – M.K. O'Neill, C. Owen

Oklahoma Agricultural Experiment Station

Oklahoma State University, Stillwater, OK – B. Carver, R. M. Hunger, A.K. Klatt, W.E. Whitmore, K. Stricklen, R.

Sidwell, B. Weidenmaier, L. Bohl

D. Jones, R. Thacker

Iowa Agricultural Experiment Station

Iowa State University, Ames, IA – R. Skrdla; J. Jannink

Kansas Agricultural Experiment Station

Kansas State University, Manhattan, KS – A. Fritz, K. Suther, KSU

Hays Experiment Station – J. Martin, C. Seaman

Colby Experiment Station – P. Evans

Hutchinson Experiment Station – W. Heer

Colorado Agricultural Experiment Station

Colorado State University, Ft. Collins, CO – S. Haley, J. Stromberger, B. Clifford, J. Butler

Nebraska Agricultural Experiment Station

University of Nebraska, Lincoln, NE – S. Baenziger, J. Bohlmann, M. Montgomery,

V. Hansen (USDA-ARS), UNL

North Platte Station – R. Klein UNL

Panhandle Research Station, Scottsbluff – D. Baltensperger UNL

High Plains Ag. Laboratory, Sidney – T. Nightingale, G. Frickel

Wyoming Agricultural Experiment Station

University of Wyoming, Torrington Substation – J. Krall, J. Natchman University of Wyoming

South Dakota Agricultural Experiment Station

South Dakota State University, Brookings, SD – Amir Ibrahim, S. Kalsbeck, R. Little, Yue Jin, M. Langham

North Dakota Agricultural Experimental Station

North Dakota State University, Fargo, ND – J. Ransom

NDSU, Williston Branch Station – N. R. Riveland

NDSU, Hettinger Branch Station – E. Eriksmoen

Montana Agricultural Experimental Station

Montana State University, Bozeman, MT – P. Bruckner, J. Berg

Central Ag. Research Center, Moccasin – D.M. Wicham

Illinois Agricultural Experiment Station

University of Illinois – F. Kolb

Minnesota Agricultural Experiment Station

University of Minnesota, St. Paul, MN – J. Anderson, G. Linkert

Hard Winter Wheat Regional Nursery Program - Contributors

Ohio Agricultural Experiment Station

The Ohio State University, Wooster – Clay Sneller

Oregon Agricultural Experiment Station

Oregon State University, Corvallis, OR – J. Peterson

Missouri Agricultural Experiment Station

University of Missouri, Columbia, MO – A. McKendry, D. Tague

Agriculture and Agrifoods Canada

Ag. Research Station, Lethbridge, Alberta – R. Graf

Table 1. Location notes, 2005 SRPN.

Location	Notes
Clovis, NM dryland	Planted 10-4-04, seeding rate 30 lb/ac, previous crop fallow; harvested 06-14-05; seasonal precipitation 18.3 in; fertilization (season): N 88 lb/ac; P 20 lb/ac; S 10 lb/ac; B 0.1 lb/ac; Fe 1 lb/ac; Mn 0.6 lb/ac; Zn 2 lb/ac. Herbicides: Express 1/4 oz/ac; 2,4,-D 1/2 pt/ac, spring application.
Clovis, NM irrigated	Planted 10-19-04, seeding rate 90 lb/ac, previous crop fallow; harvested 6-23-05; seasonal precipitation = 18.3 in + 13.0 in irrigation; fertilization (season): N 128 lb/ac; P 40 lb/ac; S 20 lb/ac; B 0.1 lb/ac; Fe 1 lb/ac; Mn 0.6 lb/ac; Zn 2 lb/ac. Herbicides: Express 1/4 oz/ac; 2,4,-D 1/2 pt/ac, spring application.
Farmington, NM irrigated	Planted 10-06-04, seeding rate 100 lbs/ac; harvested 07-19-2005; irrigation 22.75 in, seasonal precipitation = 6.6 in; total fertilizer = 136-52-30 N-P2O5-K2O lbs/acre; herbicide: 1/2 pint/acre 2, 4-D Lo Vol 6 Ester, and 1/8 pint/acre Clarity, April 1, 2005; insecticide = 1 pint Lorsban applied Apr 1, 2005.
Prosper, TX	Moderate stripe and leaf rust.
Chillicothe, TX	Moderate stripe and leaf rust.
Bushland, TX dryland	Lost, severe stripe rust and hail.
Bushland, TX irrigated	Lost, severe stripe rust and hail.
Ft. Cobb, OK	New location this year; replacement for Altus, OK. Sandy soils at Ft. Cobb conducive to drought stress, but also allow timely harvest. 2005 crop drought-ripened with very limited moisture in April-May. Moderate infection of stripe rust, followed by late and light infection of leaf rust. Early maturity highly favored in 2005.
Lahoma, OK	Hot spot for disease in 2004-2005. Significant yield losses expected for genotypes susceptible to either wheat spindle-streak mosaic or wheat soilborne mosaic virus. Prolonged and severe infection by stripe rust also reduced yields. BYD present in late April. Leaf rust also present in late April throughout May. Drought-accelerated maturity. Shattering occurred, but light. Lodging in the form of brackling.
Stillwater, OK	Very little disease, and planted extremely late (early December). Rain-delayed harvest, but no shattering.
Goodwell, OK irrigated	Stripe rust the main event in 2005. Prolonged and severe. Spotty indications of powdery mildew and leaf rust. Late freeze not believed to be a factor. Some wind-shattering. Highest yields 15 bu below normal. Stripe rust reduced irrigated yields of highly susceptible genotypes by up to 50 bu/ac.
Manhattan, KS	Lost, late season freeze damage.
Wichita, KS	Fall water damage, some cold damage after heading, severe soilborne mosaic virus.
Hutchinson, KS	
Hays, KS	Some shattering of heads.
Salina, KS	Late infection of leaf rust did affect test weight of susceptible later maturing selections.
Winfield, KS	Disease pressure from wheat spindle streak mosaic virus and stripe rust.
Colby, KS	Planted 9/21/04, fertilizer 60-0-0 (NPK), harvest 6/27/05
Garden City, KS	
Akron, CO	Planted September 27 2004, harvested July 14 2005 - excellent stands and fall growth, adequate winter and early spring moisture, very high yield potential in early April, very dry late April and early May, very severe drought stress by early May, high temperatures and hot dry winds the third week of May did severe damage (though a bit less than at Burlington), good early June rains were too late, very high temperatures late in grain filling. Two rains delayed harvest. Moderate levels of stripe rust. Heavy late spring RWA infestation while wheat was trying to extend from the boot.
Burlington, CO	Planted September 13 2004, harvested June 29 2005 - excellent stands and fall growth, adequate winter and early spring moisture, very high yield potential in early April, very dry late April and early May, very severe drought stress by mid-May, high temperatures and hot dry winds the third week of May did severe damage, good early June rains were too late, very high temperatures late in grain filling. Very low levels of stripe rust. Heavy late spring RWA infestation while wheat was trying to extend from the boot.

Table 1. Location notes, 2005 SRPN.

Location	Notes
Fort Collins, CO	Fort Collins (irrigated) (planted September 17 2004, July 20 2005) - high temperatures throughout the growing season limited yields and reduced test weights, though moisture was plentiful from June rains and irrigation. Severe stripe rust infection. Low levels of early spring RWA infestation.
Julesburg, CO	Planted September 15 2004, harvested July 11 2005 - excellent stands and fall growth, adequate winter and early spring moisture, high yield potential in early April, very dry late April and early May, drought stress by early May (not as severe as further south), high temperatures and hot dry winds did not do damage as further south, very high temperatures late in grain filling. Rains delayed harvest and lowered test weights. Moderate levels of stripe rust.
Walsh, CO	Planted September 29 2004, harvested June 28 2005 - excellent stands and fall growth, decent winter and early spring moisture, adequate moisture in April and May to sustain lush growth, good early June rains. Severe stripe rust infection before heading of most entries. Minor freeze damage due to April 28-29 low temperatures. Largely escaped drought and high temperatures in May as well as high temperatures late in grain filling.
Lincoln, NE	Infected with soilborne mosaic virus.
Clay Center, NE	Fairly heavy stripe rust infection.
North Platte, NE	
Alliance, NE	Infected with tanspot.
Sidney, NE	
Winner, SD	
Dakota Lakes, SD	
Brookings, SD	
St. Paul, MN (field rusts)	
Flora, IL	Fungal disease control by application of Tilt.
Lafayette, IN	Single replication, observation only.
Archer, WY	Typical rough going at WY.
Columbia, MO	Planted 10-07-04, harvested 06-29-05; wet winter conditions.
Wooster, OH	
Bozeman, MT	Single replication, observation only.
Crawfordsville, IA

¹From Amir Ibrahim, South Dakota State, FHB ratings are based on a 0-9 scale. Incidence is the number of infected ears. Severity is the average of the scab ratings * 10. Disease Index is incidence * severity/100.

*Readings taken at Enid, OK (pH = 4.6, 70 ppm Al, and Al saturation = 11%).
 Scale of 1 (highly tolerant) to 5 (highly susceptible), in which Jagger = 2. First reading could be biased by winter dormancy pattern; second reading could be biased by extreme differences in growth habit; third reading yielded greatest confidence.
